## PROJECTS

(2023 - PRESENT)

### Book Library

#### Full Stack Book Library App

- Developed a full-stack blog application using React, Node.js, Express.js, and MongoDB.
- Implemented user authentication (sign up, login, and secure sessions).
- Enabled users to create, edit, and update blog posts with real-time updates.

### MyBlog

#### Full Stack Blog App

- Built a library management system using React, Node.js, Express.js, and MongoDB.
- Implemented user registration, login, and authentication.
- Allowed users to perform CRUD operations.
- Enhanced skills in backend API development, database operations, and full-stack integration.

### SkillMine

#### Multi Page Learning Website

- Designed and developed the frontend of a learning management system using HTML, CSS, JavaScript, and React.
- Focused on creating a clean, intuitive, and responsive interface for students and instructors.
- Integrated interactive UI components to enhance the learning experience.
